Project Profile:-

Project # 1 :   Hospitality/Tourism (PMS)

Role   : Java Developer
Team Size   : 15

Environment:
Microservices with Spring Boot, JDK-8, Postgres, Elasticsearch,
Kafka & Zookeeper, JIRA, Bitbucket, IntelliJ Idea, Kibana and Jhipster.

PMS Description :
A Property Management System (PMS) software, is a type of hotel management software, which functions as a central point of control, allowing hotels and resorts to easily manage day-to-day operations. For instance, it could assist with the management of reservations, payments, inventory management, performance analysis and housekeeping tasks.

Role and Responsibility:-
Implemented Checkin and Checkout functionality.
Wrote Reindex API's for reindex data from db to elasticsearch.
Implemented Room Definition Status Update.
Implemented Export Report Functionality.

Project # 2 :   Hospitality/Tourism (CMS)

CMS Description:
ATITHIH Channel Manager is cloud based, single sign-on application which helps hoteliers to update Rate, Inventory and other details of a hotel across multiple channels parallelly in real time. With ATITHIH Channel manager, hoteliers can create Rate Plans and can update the Rate for single days as well as a bulk amount of Date. With ATITHIH channel manager, hoteliers can have a look who all have Checkin and Checkout on a particular day, It helps with all lists of booking created from any source (OTA's, Booking Engine, PMS, Mobile APPs).

Roles & Responsibility:-
Implemented Single Inventory and Bulk Inventory Update Functionality.
Implemented Bulk Rate Update Functionality.
Used Swagger for Testing the Rest Service API.

Interest:
- ✔ Interacting with new peoples.
- ✔ Moving at new places.
